Moving On

Jardin de Mariposa Secreto Collection *Secret Garden of the Butterflies*

For Native peoples, the butterfly represents *new beginnings, self transformation, balance & grace*. People the world over are fascinated by butterflies because of their amazing process of metamorphosis. This breath-taking, high-end sculpture on Alabaster evokes a special feeling of movement & grace and is brilliantly engineered to allow one to place the butterfly by itself on a tree branch, wall or column by inserting it through a small hole & attaching the locking mechanism on the other side. Separating the glass butterfly from its *presentation* also allows for safe shipping & transport. Collect them on special occasions & group them together for a stunning visual effect. Individually, or grouped together they will add a touch of magic, movement & possibility to the space you embody.

Overall Dimensions: 23" long x 12" wide x 24" high
Glass Butterfly Alone: 20" long x 11" wide x 6" high
