

“HIGH DESERT PONIES
Kiln-worked Glass & Aluminum

Sleek, high-end, kiln worked glass enameled with golden shadows for lovely but subtle depth of field. The glass was carefully draped at high temperatures to achieve it's gentle undulating shape adding to the sculpture's sense of movement.

The glass Ponies are mounted on a large, solid, polished piece of aluminum, which is in turn embedded in a large, two inch thick white enameled pine.

The glass Ponies can be removed and wall mounted at the owner's discretion as shown to the right. One of a kind. About 42" long x 16" tall x 20" deep. See our contact page for more information.
